DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1, 6-22, 27-43, and 48-63 are drawn to “motion vector detection/generation” in non-compressed images, classified in class 348, subclasses 154-155, 699-700.
 - II. Claims 2-5, 23-26, and 44-47 are drawn to “panoramic image generation”, classified in classes 348, subclasses 36 and 39.
2. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
3. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.
